

## Cut Paper Valentines

1. Select either the Lovebirds or Flaming Heart template and enlarge or reduce to your desired size. (Please note that the Flaming Heart template is not an exact mirror image. Be sure to read step 5 for cutting directions!)
2. Fold your desired paper in half and place dotted edge of template along the fold.
3. If desired, transfer the image to your paper using carbon paper. Alternately, you can simply place template on top of your paper and hold them all together as you cut out the shapes. If this is too cumbersome, staple the template to the paper, making sure to staple in areas you will be cutting out, not on the design itself!
4. Cut along the solid black lines.
5. Flaming heart: Follow steps above. Then unfold the heart. Cut out the letter template and place it on your heart, matching up the letter O. Trace letter template, then cut along your lines. Make sure that lightning bolts stay attached to the letters!
6. Unfold your heart and enjoy! Glue onto a card, hang in a window or simply give it to your Valentine as is.
